

Current TCEQ Air Permitting Activities

Beryl Thatcher, Manager
Chemical Section
Air Permits Division

HB 788 - GHG

- TCEQ granted authority to issue GHG permits
- No opportunity for contested case hearings
- Rulemaking required
- SIP approval required

HB 788 - GHG

- EPA continues to be issuing authority (for now)
- Transition of GHG permits
- Commission can begin reviewing GHG applications once rules effective and SIP approved

SB 1756 - Expedited Permitting

- Demonstrate application will benefit the economy
- Executive Director may grant an expedited processing request
- Doesn't affect contested case hearing requirement, public notice requirements, or public comment

SB 1756 - Expedited Permitting

- Surcharge may be added by rule for expedited processing
- May authorize use and/or payment of overtime or contract labor to process expedited applications

SB 1756 - Expedited Permitting

- TCEQ is evaluating implementation strategies
- Build accountability so surcharge is being spent on the expedited permit
- Rulemaking necessary to implement

Flexible Permits

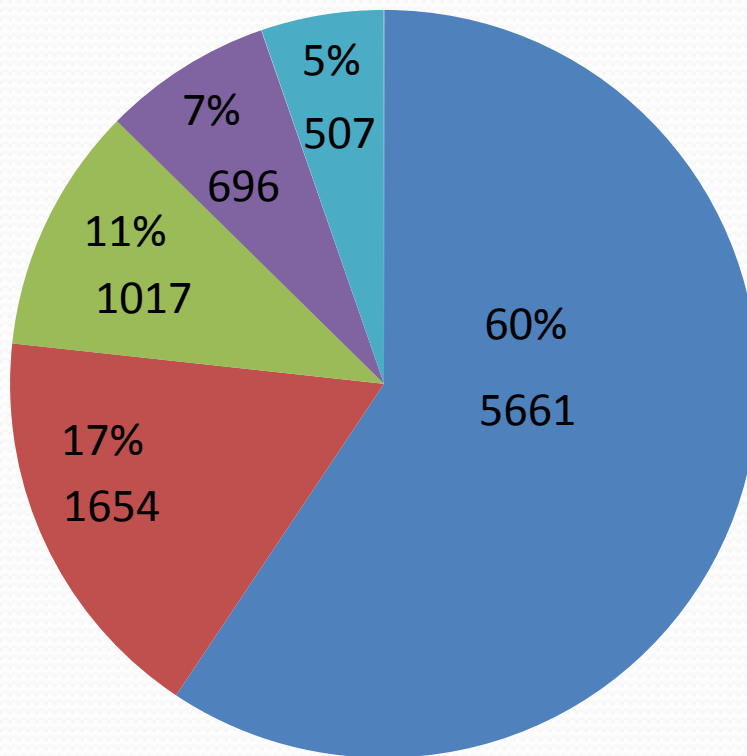

- Deflexed 90 permits
- 12 pending deflex applications
- 12 applications on-hold

- Continuing to work with EPA

Oil and Gas MSS

- Oil and Gas MSS call-in is January 5, 2014
- Oil and Gas PBR should be effective September 10, 2013
